LinkedIn | Remote, TX **March 2022 — December 2022**

UI Engineer

Implemented and supported front end components for LinkedIn Learning's Cosmo.

- Ember to implement and maintain front-end UI components
- Artdeco, an internal UI library
- Support production deployments using an internal CI/CID tool (CRT) and troubleshoot issues while oncall
- JIRA for tracking stories and participate in all scrum ceremonies during two-week sprints
- GitHub for source control and peer reviews allowing for better collaboration; Confluence for documentation

JPMorgan Chase & Co. | Plano, TX **Sept 2021 — March 2022**

UI/UX Developer

Implemented and supported APIs as a part of the API Gateway team (APIGW) in order to help facilitate smooth access and integration with JPMC services.

- Apigee Edge and JavaScript for onboarding new partners and consumers
- Support production deployments and troubleshoot issues with consumer access
- JIRA for tracking stories and participate in all scrum ceremonies during two-week sprints
- Bit bucket for source control and peer reviews allowing for better collaboration
- Confluence for documentation, for knowledge transfers

ARGO | Richardson, TX **June 2020 — August 2021**

Application Developer II

Worked closely with project managers and fellow developers to deliver updated pages for UI Refresh efforts.

Implement and maintain application features using HTML, CSS, JavaScript and ARGO's internal Browser Core Framework (BCF).

- ARGO's UI library, HTML and JavaScript for implementing updated page layouts, such as collateral pages
- Manual and scenario testing of code, design, and functionality in order to ensure a high level of quality.
- Proprietary middle tier bug fixes to maintain legacy code base.
- Maintain application features using HTML, CSS, JavaScript.
- Created documentation to assist new team members with setting up the ARGO development environment

Elevate | Addison, TX

Sept 2019 — June 2020

Developer I

Implemented eligibility rules for an internal tool for customer service, called The PaymentFlexibility Tool.

- .NET Core and C# to implement eligibility rules for the tool
- XUnit for achieving code coverage requirements by writing unit and integration tests.
- Maintain application features using HTML, CSS, and JavaScript and some Angular.
- Angular 9 and Typescript for implementing front end components such as tables and grids for the different programs for the tool.

Leo A Daly | Dallas, TX

Dec 2018 — Sept 2019

Software Developer Intern

- Created pages for the migration of the public facing site to WordPress from Umbraco.
- Optimize images for the web using Photoshop
- Improved SEO by adding relevant phrases via the Yoast plugin.
- Enhanced the intranet by implementing business card preview pages using HTML and CSS, allowing users to confirm the business card look and feel before submitting an order for their department.

Projects

tdraft (PWA, React, Redux, Hooks, MUI, HTML, CSS, JavaScript, jsx, Google Analytics)

- Simple, responsive, and mobile first text editor for the web
- Managed state with Redux and implemented the MUI FAB for the info, back, and share buttons
- Site: tdraft.io
- Code: github.com/Theobasallaje/betterletter
- iOS: <https://apps.apple.com/us/app/tdraft/id1643448985>
- Google Play: <https://play.google.com/store/apps/details?id=io.tdraftijna.twa>

The Oracle at Delphi (React, HTML, CSS, JavaScript, jsx, RESTful)

- Simple and fun site that displays random jokes from the random jokes API using GET requests
- Site: theobasallaje.github.io/the-oracle-at-delphi
- Code: github.com/Theobasallaje/the-oracle-at-delphi

Color Game (HTML, CSS, JavaScript)

- Simple fun guessing game for RGB colors
- Site: theobasallaje.github.io/color-game/
- Code: github.com/Theobasallaje/color-game/
